to reduce volume during a phone call or when listening to music.

FAQ and Trouble Shooting

1.RG RSM 2 cannot be started.

Maybe due to low battery. Please charge 3-4 hours and start.

2.No sound.

Please check whether the headset is plugedin correctly, whether volume is too low and whether audio channel is correct ?

3.Speaker has echoes.

Maybe due to 2 pieces of RG RSM 2 are too close to each other or due to too big volume.

4.Uexpected disconnection from smart phone.

Please check whether due to low battery ? whether more than 10 meters from smart phone ? whether there is a screening barrier between them that absorbs transmission, e.g. metal or water ?

5.Cannot pair with smart phone?

Please first remove pairing history from both. Please place them in 1 meter range and make pairing.

6.Cannot set up connection with smart phone?

Please make sure that the smart phone has Bluetooth and is compatible with protocol HFP, A2DP and AVRCP.

7.Failure in reconnecting with mobile phone.

Remove all the pairing history as well as that of your phone. Then turn off your mobile phone, restart mobile phone several seconds after taking out the battery, and pair with RG RSM 2 again.

8.What if RG RSM 2 freezes?

 RG RSM 2 freezes when strong radio frequency interferes. E.g. nearby
 high power TV transmitting tower, GSM hub or airport radar.
 Then get away and reset it by charging once or more times.

9.Abnormal instruction of charging indicator.

a) RG RSM 2 has idled for a long time or has been overused, so it needs to be
 pre-charged for an hour, then pull out and charge again, it will indicate
 normal charging. Please don't take the pre-charging time into account.

b) Try another USB cable or charger

10.Can RG RSM 2 be operated as it is charged ?

 We do not recommend operation as it is charged.

11.Compatibility with other chargers.

 Cigarette lighter charger of the motorcycle, emergency battery pack or
 other type charger might be used for charging as long as their actual
 output voltage is between 5V to 6V and have the same plug and the same
 power polarities as our original charger, in which case the user will be
 responsible for the risk brought by himself.

**12.Please return your RG RSM 2 to our after-sales department for
 maintenance if above 1 to 11 solutions DO NOT WORK.**
